01 Platform Overview

MediaVue Platform

Our platform is a set of integrated products and services used to efficiently and securely deploy, operate, and maintain enterprise digital signage networks.

02 Active Network Manager

Management Software

Active Network Manager enables you to efficiently and securely deploy, operate and support large, distributed digital signage networks under challenging, real-world conditions. Active Network Manager actively manages all the operations of players and connected devices, preventing and automatically correcting problems when possible, providing information and tools that enable remaining problems to be fixed with minimum downtime and cost.

Features

Provides unparalleled visibility and reliable remote management

- ✔ **Batch processes**
Actions can be applied to an entire network or to a flexibly defined group of players.
- ✔ **Compliance Mode**
Set and maintain configurations for the network, players, and attached peripherals.
- ✔ **Display control**
Configure and control displays and other attached peripherals.
- ✔ **Cloud or on-prem**
Available as a cloud service or an on-premises installation.
- ✔ **Secure control layer**
Hands-free remote recovery of any system software fault. No more service calls for hung players.

03 Enhanced Support
